Call for papers COVID-19 Pandemic, Green Economy, and Monetary-Fiscal Policy

Guest Editors:

Dr. Chun-Ping Chang, Shih Chien University, Taiwan (cpchang@g2.usc.edu.tw)

Dr. Naoyuki Yoshino, Keio University, Japan (yoshino@econ.keio.ac.jp)

Dr. Yu Hao, Beijing Institute of Technology, China (haoyuking@163.com)

Synopsis and Subject Coverage

The spread of the novel coronavirus (COVID-19) outbreak has had a significant negative effect on the global economy. In response to the pandemic, most of the Asian countries have adopted appropriate monetary and fiscal policies to mitigate the effects of the pandemic. Similarly, the pandemic has impacted the green economy: for instance, with the stagnation of international travel (tourism) and reduction in global productions, risks to the environment have declined. As tourism and global economies recover, as new fiscal and monetary policies stimulate growth, the implications of such policies on green economy status will need to be evaluated. This special issue of BMEB will not include papers that examine the effectiveness of fiscal and monetary policies on economic recovery but also on how those policies are likely to impact the green economy profile of countries and the Asian region.

The *Bulletin of Monetary Economics and Banking* is planning a special issue on "Covid-19 Pandemic, Green Economy, and Monetary-Fiscal Policy". Manuscripts (research articles) related to the theme of this special issue are welcomed. Ideally, papers should be 6,000 words in length including tables/figures and references. We aim to cover relevant and up-to-date topics related to:

- (1) The consequences of monetary and fiscal policies after the pandemic.
- (2) The government responses to the impact of COVID-19 on financial markets, labor, and commodity markets.
- (3) Changes in the pattern of international trade before and after COVID-19.
- (4) Disconnection between depressed real economies and buoyant financial markets during the post-pandemic era.
- (5) The role of central banks, financial markets, and international institutions during the post-pandemic era.
- (6) Financing along with the supply chain: strengths and weaknesses and its future.
- (7) Government policies, regulations, and public health systems during the post-epidemic era.
- (8) Environmental outcomes of monetary and fiscal policy responses to COVID-19.
- (9) Green economic efficiency change due to COVID-19.
- (10) Renewable energy development during the post-epidemic era.

BUSINESS DEANS
COUNCIL**Submission Deadlines:**

Submission start: 15th November 2021

Submission deadline: 25th January 2022

Editorial decision deadline: 15 August 2022

Publication Deadline: November 2022

Submission Procedure

All papers should be submitted online at <https://www.bmeb-bi.org/index.php/BEMP>

All papers should be prepared with author guidelines. Author(s) should use recent BEMB published papers as a guide in formatting their paper. The cover letter should mention that the paper submitted is for this special issue.
